ABOUT ME

I am a third-year e-business student, enthusiastic about applying my theoretical knowledge and gaining practical experience in the field. My passion for continuous learning and personal growth motivates me to pursue new knowledge and enhance my skills. I am excited to embrace new challenges and contribute my expertise to a dynamic team.

ACADEMIC PROJECTS

• Interactive Dashboard Creation

Created an interactive dashboard using Streamlit package.

• Evaluating Machine Learning Techniques

Conducted data preprocessing, classification using methods like ANN+RB and ANN+SVM, and optimized ANN algorithms. Evaluated performance with measures such as error and accuracy, showcasing technical proficiency and effective teamwork.

• E-commerce Application Development

Develop a web application for an existing tunisian small business using React-Bootstrap for the front-end and Node.js with Firebase for the back-end, ensuring a seamless integration of technologies for a responsive and scalable solution.

• SCRUM-Driven Application Development

The main purpose of this project is to implement a real-world project using SCRUM. Applied daily stand-ups, sprint planning, and reviews, fostering continuous improvement. Developed skills in project management, teamwork, and agile methodologies.
